## W02 Sign Up: Student Presentation

4 26

The Student Presentation assignment is an opportunity for you to research, plan, design, and create a video presentation on a selected topic in front-end web design and development during the course. You will select a topic from the sign-up sheet provided, note the week in which it is due and post your presentation in the week's Developer Forum by Monday of the selected week for peer review and discussion during the week.

 The gospel principle shown in this [Teaching One Another video](https://cdnapisec.kaltura.com/p/1157612/sp/115761200/embedIframeJs/uiconf_id/33020032/partner_id/1157612?iframeembed=true&playerId=kaltura_player_1529606936&entry_id=0_dhwt5yq0&flashvars%5BstreamerType%5D=auto) ([https://cdnapisec.kaltura.com/p/1157612/sp/115761200/embedIframeJs/uiconf\\_id/33020032/partner\\_id/1157612?iframeembed=true&playerId=kaltura\\_player\\_1529606936&entry\\_id=0\\_dhwt5yq0&flashvars%5BstreamerType%5D=auto](https://cdnapisec.kaltura.com/p/1157612/sp/115761200/embedIframeJs/uiconf_id/33020032/partner_id/1157612?iframeembed=true&playerId=kaltura_player_1529606936&entry_id=0_dhwt5yq0&flashvars%5BstreamerType%5D=auto)) is embedded in all aspects of our lives. It is a foundation method at BYU-Idaho both on campus and online.

Your narrated video presentation can be created using a presentation software tool like PowerPoint or Keynote or using a web-based program like Prezi, Haiku Deck, Google Slides, CodePen, jsFiddle or equivalent. You are not limited to these applications. After you have created your presentation, you will need to use a screen casting program like [Screencast-O-Matic](https://screencast-o-matic.com/screen_recorder) ([https://screencast-o-matic.com/screen\\_recorder](https://screencast-o-matic.com/screen_recorder)) or equivalent to record yourself narrating the presentation. After recording your screencast, you will need to upload your video to your website, YouTube channel, or other public access location and post the link to the Developer Forum Discussion Board for that week along with any discussion notes you may wish to include. Plan to support that post by answering any questions that are posted in the thread.

 [Example Student Presentations](https://byui.instructure.com/courses/244784/modules/items/30369092)  
(<https://byui.instructure.com/courses/244784/modules/items/30369092>)

## Presentation Requirements

- ▶ Create a screencast—a video capturing your screen with narration. Typically, you can capture the whole screen, a window, or a selected area.
- ▶ The video must be in .mp4 format which can easily be placed into a public channel like YouTube, a direct link located on a public web server, or on your GitHub Pages as a link or as a

page with [HTML5 video control \(https://www.w3schools.com/html/html5\\_video.asp\)](https://www.w3schools.com/html/html5_video.asp).

- ▶ Include examples of the topic and *demonstrations* versus just definitions and discussions.
- ▶ The video should be about 10 minutes in length.
- ▶ A link to your presentation will need to be posted in the week's Developer Forum Discussion Board by *Monday* in the week it is due. Do NOT attach your video file to the discussion board.
- ▶ **Subscribe** to the board and support your post by answering any questions or queries posted by your peers or the instructor about your topic and presentation.
- ▶ Submit to the [Student Presentation assignment \(https://byui.instructure.com/courses/244784/assignments/10964551\)](https://byui.instructure.com/courses/244784/assignments/10964551) drop-box.

## Instructions

1. You will receive an email or announcement from your instructor that will allow you to sign up for an available presentation topic by inserting your name next to the topic in the blank space provided.
2. Create a thread listing your confirmed topic with the week number for which you signed up and provide a brief comment on why you selected that topic.

## Assessment

You will be assessed by signing up for an available presentation by the due date and for creating a thread with the required content.

Apr 25, 2023

Hello! I picked "CSS Class vs. ID Selectors - which one should I use?" for week 4. Since my wife is 7 months pregnant I want to make sure I'll have the availability to complete the assignment so the sooner the better for me :) any of the topics were interesting and all of them require us to deep dive into the topic to be able to present it for the class.

 [Reply](#)<https://byui.instructure.com/courses/244784/users/533431>

Apr 25, 2023

Hello everyone! I picked "CSS combinators" for week 4. I chose this subject for two reasons:

1. I found it interesting in previous semesters, and now I have the perfect excuse to learn more about it.
2. Thinking about making a presentation stresses me out, so I thought it would be better to do it as soon as possible.

Apr 25, 2023

Hello everyone,

I have picked the topic, "Chrome Dev Tools" for week 4. The reason I chose that topic is that I strongly feel that I need to know more about Dev tools which we will be using for this course and the future giving me so much more to do research on and further my knowledge on.

Apr 26, 2023

Hello Guys!

For the student presentation this semester I have chosen the topic, "Form Input Validation". The reason for me choosing this topic is personally I think validation and authenticity of information and user input is one of the most important aspect of technology in today's era. When something is tested and proven valid, some level of trust and reliability can be placed on it. In Summary, form validation technical process where a web-form checks if the information provided by a user is correct." The form will either alert the user that they messed up and need

to fix something to proceed, or the form will be validated and the user will be able to continue with their registration process.

Apr 26, 2023

⋮

Hey! I chose CSS KeyFrame Animations, this has always been interesting to me so I am excited to learn more. I will cover this and upload a video in week 8. Is there anyway I could have two subjects? I am 6 months pregnant and at the moment just a stay at home wife. I have a lot of free time and I feel like being more involved in the class will help me a lot with my studies.

Apr 26, 2023

⋮

Hi everyone,

I picked the topic "Writing a proper title and description" and will be posting on this on week 5. On one of my classes last semester I learned of the importance of creating a clear description for your website. I think having a clear audience and purpose for our websites is vital in creating our content and I'm definitely looking forward to diving deeper into this subject and learning more about it.

Apr 26, 2023

Greetings to all!

I chose "JavaScript - Event Listeners" and will be presenting during week 6. I have a basic understanding of what can be done with event listeners and would like to learn more. I have seen some videos online with really cool things you can do with "clicks" and event listeners. I hope to gain a better understanding and share the interesting information with everyone.

Apr 27, 2023

Hi guys!

I picked "The DOM" topic for week 4. I chose it, because from the list "The DOM" was the most familiar topic that I knew nevertheless, the preparation for this presentation is going to help me to learn much more about the topic. I hope that I can give you guys a good presentation and all gather together will be able to understand this topic.

Apr 27, 2023

Good day,

I have chosen Front-End Responsive Frameworks.

It would certainly be beneficial to know a few weeks in advance what needs to be covered.

For instance, Bootstrap 5 and Foundation 6 are both two excellent responsive frameworks but need some practice.

Talk you soon.

Giuseppe
